

# 60 Minutes Door

The specialty of fabricating fire containment door with SAUERLAND core is that it eliminates use of any inorganic material in the construction like Gypsum board, Cement board or Calcium Silicate or Fiberglass etc making The door light weight and 100% recyclable.

These are the most light weight fire doors, highly performance oriented for the 60minutes fire rated door category now available in India. The unique structure of SAUERLAND board is the main reason for the superior fire resistance of Fire Core - without using additional fire retarding additives. even at relatively light weight the burn-off rated is very low. This leads to doors with excellent rating and stability
